

HANOVER®

Electric Carbon Infrared Heat Lamp

with Built-In Table Stand

When choosing an outdoor heater, consider Hanover's line of electric infrared heaters. The Hanover carbon infrared heat lamp features a built-in table stand for setting your drinks on. Designed for open decking, open patios and other open air locations, it is perfect for outdoor parties and gatherings. Extend the use of your outdoor living space with a Hanover carbon infrared stand heater.

Similar to sunshine, infrared heat is a radiant heat that warms a person or an object directly, rather than heating the air in-between. Carbon infrared heat is a soft radiant heat that warms the skin efficiently. Infrared heat can be felt instantly as soon as you turn it on – no waiting for it to “warm up”.

HEATER FEATURES

- *Built-in table stand to set drinks on*
- *Downward heat direction warms up to 65 sq. ft.*
- *Ideal for deck, patio, and open air locations*
- *Premium carbon fiber technology*
