ASSEMBLY INSTRUCTIONS

1. Installation

- You will assemble the lamp base and lamp post from the top to the bottom.
- First, use four screws to join the square base (10) and the lamp base (9) together.
- To stabilize the street lamp, add the base trim (7) to the lamp base (9). **Note:** If the lantern is used outdoors and the lamp base (9) can be secured with the included ground nails (8), the base trim (7) is unnecessary.
- Assemble the lamp post by joining the two lamp post pieces (3) with the lamp post joint (12). **Note:** Each screw thread must be tightly screwed, or the lamp post will become unstable.
- Screw the assembled lamp post to the square lamp base (10). **Note:** Every screw thread must be tightened, or the lamp post may lean.
- Lay the assembled lamp post and base down on the floor to thread the power wire (6) through the lamp base and lamp post. After drawing out the wire's connector through the top of the lamp post and holding it securely, set the lamp post upright on its base, letting the wire hang over the top for now.
- Attach the lamp top (1) to the lamp holder (2).
- Draw out the wire connector to the power wire (14) of the lamp holder, then connect it tightly to the power wire hanging out of the assembled lamppost. Put the joined connectors and their wires into the lamp post (3). **Note:** At this time, it will be better to ask another person to hold the lamp holder (2) for you.
- Carefully rotate the lamp holder (2) to fasten it securely on the top of the lamp post (3). **Note:** The screw thread should be tightened as far as possible. The direction of the lamp holder (2) can be slightly adjusted to make it match the direction of the lamp base (9).
- Place your assembled lantern in its designated space where it will not be knocked down. If it will be outdoors, please secure it to the ground using the included ground nails (8).
- Join the connectors of the extended wire (5) to the power wire (6) coming out of the base and the adaptor (4).
- Make sure the connectors and all parts are tightly screwed together.
- Plug the adaptor (4) into an indoor power source.

If the lantern is used outdoors, please read and complete the instructions below:

- Screw the nut at the top of the lamp holder tightly to ensure this part is waterproof.
- All connection points (1 and 2, 2 and 3, 3 and 12, 12 and 3, 3 and 10, 10 and 9) must be screwed tightly to avoid water and electricity leakage.
- The adapter itself is not waterproof. The connecting point between the adapter and main power MUST be located indoors, free from rain and snow, to avoid electricity leakage and electric shock risk.
- The lamp support ends are equipped with a drip hole, and this hole should be unobstructed.
- The lamp holder should be kept vertical to keep it waterproof.

2. Decorate and enjoy

- Place the plaque (11) and the wreath (13) on the lamp post's upper part. (For outdoor installation, the decorations do not have to be attached.)
- Turn on the switch. You should see the snowflakes inside the lantern whirling around and hear the music playing.

Music can be controlled by the switch and turned off when not needed.

I Music and animation are turned on.

II Off

III Animation is turned on (music off).
